

## THERE ARE DIFFERENT MODELS OF CARE AVAILABLE TO SUIT A WOMAN'S INDIVIDUAL NEEDS.

If you are currently seeing your GP you need to ask if they are an Obstetric GP. This means they have done extra study and training to support you through your pregnancy.

If your GP isn't an Obstetric GP you will need to identify a current provider – their details are in the Antenatal Record provided by AWH and you can get one from your GP or go onto the Website [www.awh.org.au](http://www.awh.org.au)

You may still visit your GP and be part of GP Shared Care – this is where your GP and your Obstetric GP or Obstetrician work together during the antenatal period.

Discuss your options with your GP or phone the Midwife Care Program for more information on **02 6051 7240**.
